

Our situation is very different from any other that I know. We have two separate companies operating independently. We wanted a product that would combine as many of the duplicate duties as possible. Mark Jeffords and FileMaker Pro software saved us time and money. Mark developed a custom data management solution for us that eliminated at least 80 man hours a week. They developed the software to accomplish exactly what we had envisioned, then continued to improve the program to a level we never thought possible. Mark and his team took the necessary time and trouble to develop not only what we asked for, but improved it beyond our expectations.

Thanks Mark!
